AMENDMENT TO THE CLAIMS

Listing of Claims

WHAT IS CLAIMED IS:

 (Original) A method for selectively transmitting an email attachment, the method comprising:

receiving an instruction from a sender to add a selectable notification of an email attachment to a first email;

inserting code in the first email to transmit a reply to the sender upon execution of the code by an email client, wherein execution is responsive to activation of the selectable notification by a recipient;

generating a second email having the email attachment upon receipt of the reply; and transmitting the second email to the recipient in response to the reply.

- (Original) The method of claim 1, further comprising prompting the recipient prior to transmission of the reply to the sender.
- (Original) The method of claim 2, wherein prompting the recipient comprises requesting the recipient add comments for the sender to the reply.
- (Original) The method of claim 1, further comprising prompting the sender prior to transmission of the second email to the recipient.
- (Original) The method of claim 4, wherein prompting the sender comprises requesting the sender to locate the email attachment to transmit the second email to the recipient.
- (Original) The method of claim 4, wherein prompting the sender comprises requesting the sender add comments for the recipient to the second email.

- (Original) The method of claim 1, wherein receiving the instruction comprises receiving the instruction to exclude the email attachment from the first email.
- (Original) The method of claim 1, wherein inserting code in the first email comprises inserting a markup language.
- (Original) The method of claim 1, wherein inserting code in the first email comprises inserting an icon and linking the code to the icon.

10. (Original) A device for selective transmission of an e-mail attachment by a recipient, the device comprising:

a notification incorporator to add a selectable notification of an email attachment to a first email in response to an instruction from a sender;

a code associator to insert code in the first email to transmit a reply to the sender upon execution of the code by an email client and to associate execution of the code with activation of the selectable notification by the recipient; and

an attachment responder to generate a second email having the email attachment upon receipt of the reply and to transmit the second email to the recipient in response to the reply.

- 11. (Original) The device of claim 10, wherein the code associator inserts code comprising at least one prompter, wherein the at least one prompter permits optional entry of text in the reply.
- 12. (Original) The device of claim 10, wherein the attachment responder comprises at least one prompter, wherein the prompter permits optional entry of text in the second email.
- 13. (Original) The device of claim 10, wherein the attachment responder comprises at least one prompter, wherein the prompter requests the sender to locate the email attachment.
- 14. (Original) The device of claim 10, wherein the notification incorporator is responsive to the instruction, wherein the instruction excludes the email attachment from the first email.
- 15. (Original) The device of claim 10, wherein the code associator inserts code comprising a markup language.
- 16. (Original) The device of claim 10, wherein the code associator inserts an icon and associates the icon with the code.

17. (Original) A machine-accessible medium containing instructions, which when executed by a machine, cause the machine to perform operations for selective transmission of an e-mail attachment, comprising:

receiving an instruction from a sender to add a selectable notification of an email attachment to a first email;

inserting code in the first email to transmit a reply to the sender upon execution of the code by an email client, wherein execution is responsive to activation of the selectable notification by a recipient;

generating a second email having the email attachment upon receipt of the reply; and transmitting the second email to the recipient in response to the reply.

- 18. (Original) The machine-accessible medium of claim 17, wherein the operations further comprise instructions for prompting the recipient prior to transmission of the reply to the sender.
- 19. (Original) The machine-accessible medium of claim 17, wherein the operations further comprise instructions for prompting the sender prior to transmission of the second email to the recipient.
- 20. (Original) The machine-accessible medium of claim 20, wherein prompting the sender comprises requesting the sender to locate the email attachment to transmit the second email to the recipient.
- 21. (New) A device for selective transmission of an e-mail attachment by a recipient, the device comprising:
 - a detacher to remove the email attachment from a first email;
- a notification incorporator to add a selectable notification of the email attachment to the first email in response to an instruction from a sender;
- a code associator to insert code in the first email to transmit a reply to the sender upon execution of the code by an email client and to associate execution of the code with activation of the selectable notification by the recipient;

at least a first prompter, associated with the code associator, wherein the at least first prompter permits both a first entry of text in the reply and requests the sender to locate the email attachment:

at least a second prompter, associated with the code associator, wherein the at least second prompter permits a second entry of text in the second email; and

an attachment responder to generate a second email having the email attachment upon receipt of the reply and to transmit the second email to the recipient in response to the reply.
